Picking Blending Colors
To determine if a color will blend evenly with the next darker or lighter shade:

- Match the letters to keep the Color Family the same.
- Match the middle number to keep the Blending Group the same.
- The last number indicates how light or dark the Specific Value is.

For highlights, pick a last number with a value of 0, 1, 2, or 3. For mid tones, choose numbers 4, 5, or 6. For shadows, choose colors with a last number of 7, 8, or 9. For best results, try to keep a 2 or 3 digit difference between your colors.
Replacement Nibs

Replaceable nibs - Extend the life of your tools. Copic markers and Multiliner SP pens feature replaceable nibs to allow for customization and longevity. Mix and match different nibs to create combinations that match your preference. Replace worn out or damaged nibs for lifetime use.
